

SLAT CLEANER & SLAT PROTECTOR

SERVICE

Growing Together with Our Customers

Order code: Slat Cleaner

SLAT CLEANER

The AMADA Slat Cleaner benefits from a high torque motor that quickly removes tough slag and dross buildup on the laser bed.

The Slat Cleaner works on Copper as well as Steel support slats and can be operated on the unused slat table while the machine is running. With the AMADA Slat Cleaner, it is possible to perform cleaning from one side of the cutting bed with a single operator.

Coupled with the application of the AMADA Slat Protector the life span of the laser bed is extended.

Order code: Slat Protector

SLAT PROTECTOR

Surface protection for the laser bed slats

Coating the slats helps to prevent major build-ups of slag that is a by-product of cutting. Using the AMADA Slat Protector make the slats easier & faster to clean, and they can be used for a longer time. This facilitates time- and cost-effective work processes.

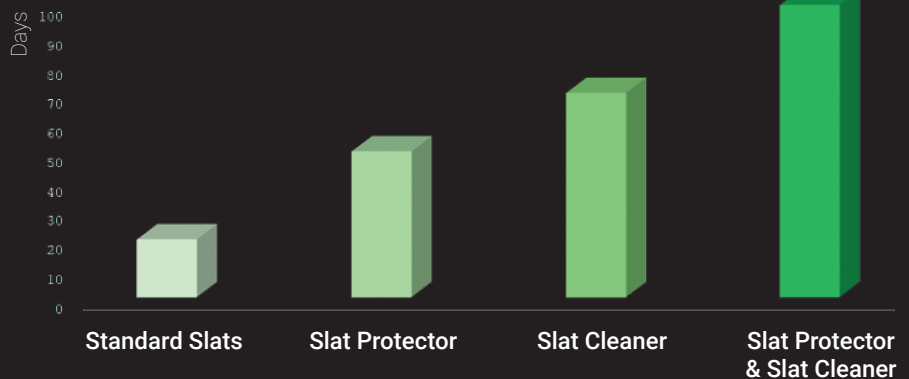

By applying via a spray gun the AMADA Slat Protector is applied in an optimal way, achieving even and effective protection.

When the slag build up becomes to high the bed can be ground with the AMADA Slat Cleaner in readiness for a new coating of Slat Protector.
